**ABSTRACT**

By use of a hand-held scraper, 10 species of Gastropoda in 6 families were collected: Potamididae (*Telescopium telescopium*, *Terebralia prolata*, *Cerithidca cingulata*, *C. obtusa*); Naticidae (*Natica fasciata*, *N. lineata*), Ellobiidae (*Ellobiella aunsjudac*), Neritidae (*Nerita chamaelon*), Muricidae (*Chicoreus capucinus*), Littorinidae (*Littorina scabra*). Measured ranges of shell length and width are shown for each species.
