ABSTRACT

A total of 76 species of marine bivalves in 23 families and 55 genera were collected from sandy beach, muddy sand, rocky shore, fishermen's bycatch, and coral reefs at islands along the coasts of Chonburi and Rayong. Only 14 species were found in both Chonburi and Rayong; 46 species were restricted to Chonburi, and 45 species were recorded in Rayong. All specimens are catalogued and deposited in the Reference Collection Museum, the Institute of Marine Science, Burapha University, Thailand.
